Status: On-going		Support GTC Strategic Priorities? (Y/N): Yes

RTAC Successes	The Region 5 RTAC, in collaboration with our regional and state partners, provided bleeding control training to well over 3,000 Georgians during the first quarter of FY 2023.
RTAC Barriers	Time constraints and staffing demands continue to be significant barriers in regard to RTAC project execution.
Date of last BIS Assessment	Adopted Jan 2012; a new BIS assessment is nearly complete.
Date of last Trauma Plan	New Regional Trauma Plan approved by the Regional EMS Advisory Council.
Date of last region meeting	10/07/22
Date of next region meeting	TBD – Jan 2023

Regional Summary

Happy 11th Birthday, Region 5 RTAC! The new Region 5 Regional Trauma Plan was adopted by the Regional EMS Advisory Council on October 12, 2022. The new Plan was approved exactly 11 years after the Regional EMS Advisory Council voted to adopt the first version of the Region 5 Regional Trauma Plan, and the original Region 5 RTAC membership was appointed.

The RTAC 5 continues to benefit from the engagement of a broad spectrum of stakeholders. Our RTAC meetings and subcommittee meetings are well attended. Many of our RTAC members and subcommittee members are engaged in multiple RTAC initiatives. We are fortunate to have many informed, capable members that can assume leadership roles when needed. In addition, Region 5 maintains two virtual “classrooms,” a regional resource library, and two regional equipment caches. Thus, we have the equipment, resources, expertise, and instructional depth to deliver multiple programs simultaneously.

One hundred percent of our public schools have completed their initial School Response Program in-service training. One hundred percent of the region’s school buses are equipped with Bleeding Control Kits. We communicate regularly with our school system partners and work to provide refresher training and new kits as needed. Many school districts have the infrastructure, resources, and expertise to sustain in-house Stop the Bleed programming, and several of our region’s school nurses assist with the provision of community training. In addition, our school system partners frequently promote and attend our webinars, outreach offerings, and other trauma education initiatives.
